AMENDMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

This paper is responsive to a telephone interview on Dec. 13, 2007, requiring a response by February 2, 2008. Please enter the remarks of the following pages and amend the above-identified application.

STATEMENT OF THE SUBSTANCE OF THE INTERVIEW

The interview of Dec. 13, 2007, between Examiner Nigar Chowdhury and Kevin Roe, concerned an amendment to claim 1 to overcome the rejections and make claims 1, and 4-14 allowable over the cited prior art, mainly US 6,311,011 by Kuroda, which disclosed multiple receivers and a plurality of tuner modules. It was agreed that the claim 1 amendment "a system controller module, consisting of one tuner, ..." and the addition of the limitations of claim 2 and claim 3, would make claim 1 allowable, and also make claims 4-14, dependent on claim 1, allowable. The full listing of the claims after this amendment follows:
